PROFILE

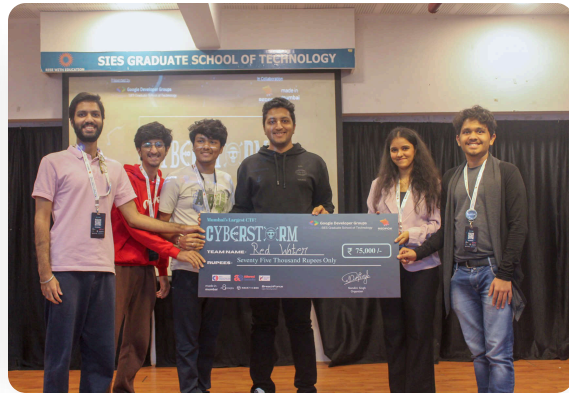

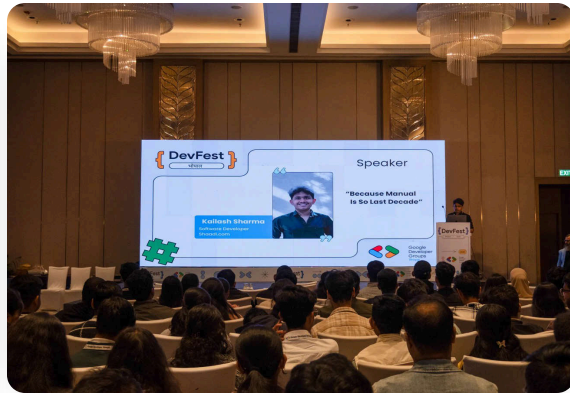

Community builder and event organizer who makes ambitious things happen and makes them feel alive. I run developer communities in Mumbai as an n8n Ambassador and a GDG MAD co-organizer, have organized events from a 5,000-registration CTF to intimate meetups, and have spoken at 20+ conferences before turning 21. High agency, obsessively organized, and AI-native in how I operate. I am also a builder who ships production AI and to the open web, so I understand the people I build with and for from the inside.

HOW I OPERATE

- **Technical front line.** Answer first-line questions on the tools, route the deep ones (fine-tuning, interpretability, alignment, agents) to the right engineer, and turn recurring questions into docs.
- **Content & artifacts.** Write the cookbooks, tutorials, demos, and launch videos that get people building, and ship in the open with 62+ repos and open-source drops on n8n.
- **Outreach & ops.** Write and test outreach sequences, track replies and metrics, run launches and AMAs, and keep budgets, RSVPs, run-of-show, and community channels clean.

COMMUNITY & EVENTS

- **n8n Ambassador, Mumbai to Bengaluru.** Launched Mumbai’s n8n community and owned the full funnel: 15,000+ Luma views tracked into 1,200+ registrations and a 1,000+ member community I moderate day to day. Now bringing it to Bengaluru with a **Women in Product** collaboration at Bengaluru Tech Week 2026 (70% female registrations).
- **Cyberstorm CTF, Main Organizer.** Mumbai’s largest CTF: 5,000+ registrations, a ~7 lakh prize pool, 200 on-ground and a 2,000-person online round. Owned sponsors, budget, logistics, and run-of-show.
- **GDG MAD Mumbai, Co-Organizer.** Organized 3-4 events, landing strong speakers and collaborations, ~70% professional attendance.
- **FOSS Hacks Pune, Mentor.** Mentored 20+ teams at India’s largest FOSS United hackathon; one went on to win.
- **Speaking.** 20+ conferences before 21: DevFest Bhopal & Mumbai (400+ each), Droid Tribe, Swift Mumbai & Bengaluru, GDG MAD, Flutter Sparks, Android Developers Meetup Pune, and Shaadi’s Huddle in front of Anupam Mittal.

Building, Recognition & Education

BUILDING EXPERIENCE

Shaadi.com *SDE · 2024 - 2026*

- Owned real-time chat and messaging for 200,000+ daily users. Built [PeopleGPT](#) and drove org-wide AI adoption; recognized internally as "Pioneer of AI."

Open Paws *AI Engineer · 2025 - Present*

- Work alongside researchers and engineers on production AI: agentic multi-agent pipelines with evaluation loops, published open-source on n8n. Shipped Impact Stack and the ACE Research Library.

Apps shipped *Founder / Builder*

- [Tajly](#) is live on the App Store and Play Store; [Tripify](#) grew to 1,500+ users and was acquired. 62+ public repos on GitHub.

RECOGNITION

- 2x Top 100 in the world at the Google Solution Challenge (2,000+ applicants).
- 1st place at Mumbai Hacks (500+), Top 5 in Telangana's largest Google hackathon.
- #AndroidSpotlight and Google Play Academy feature; top 3% early adopter of Jetpack Compose.
- Titan Design Impact finalist; Special Recognition at HackOdisha 3.0.

EDUCATION

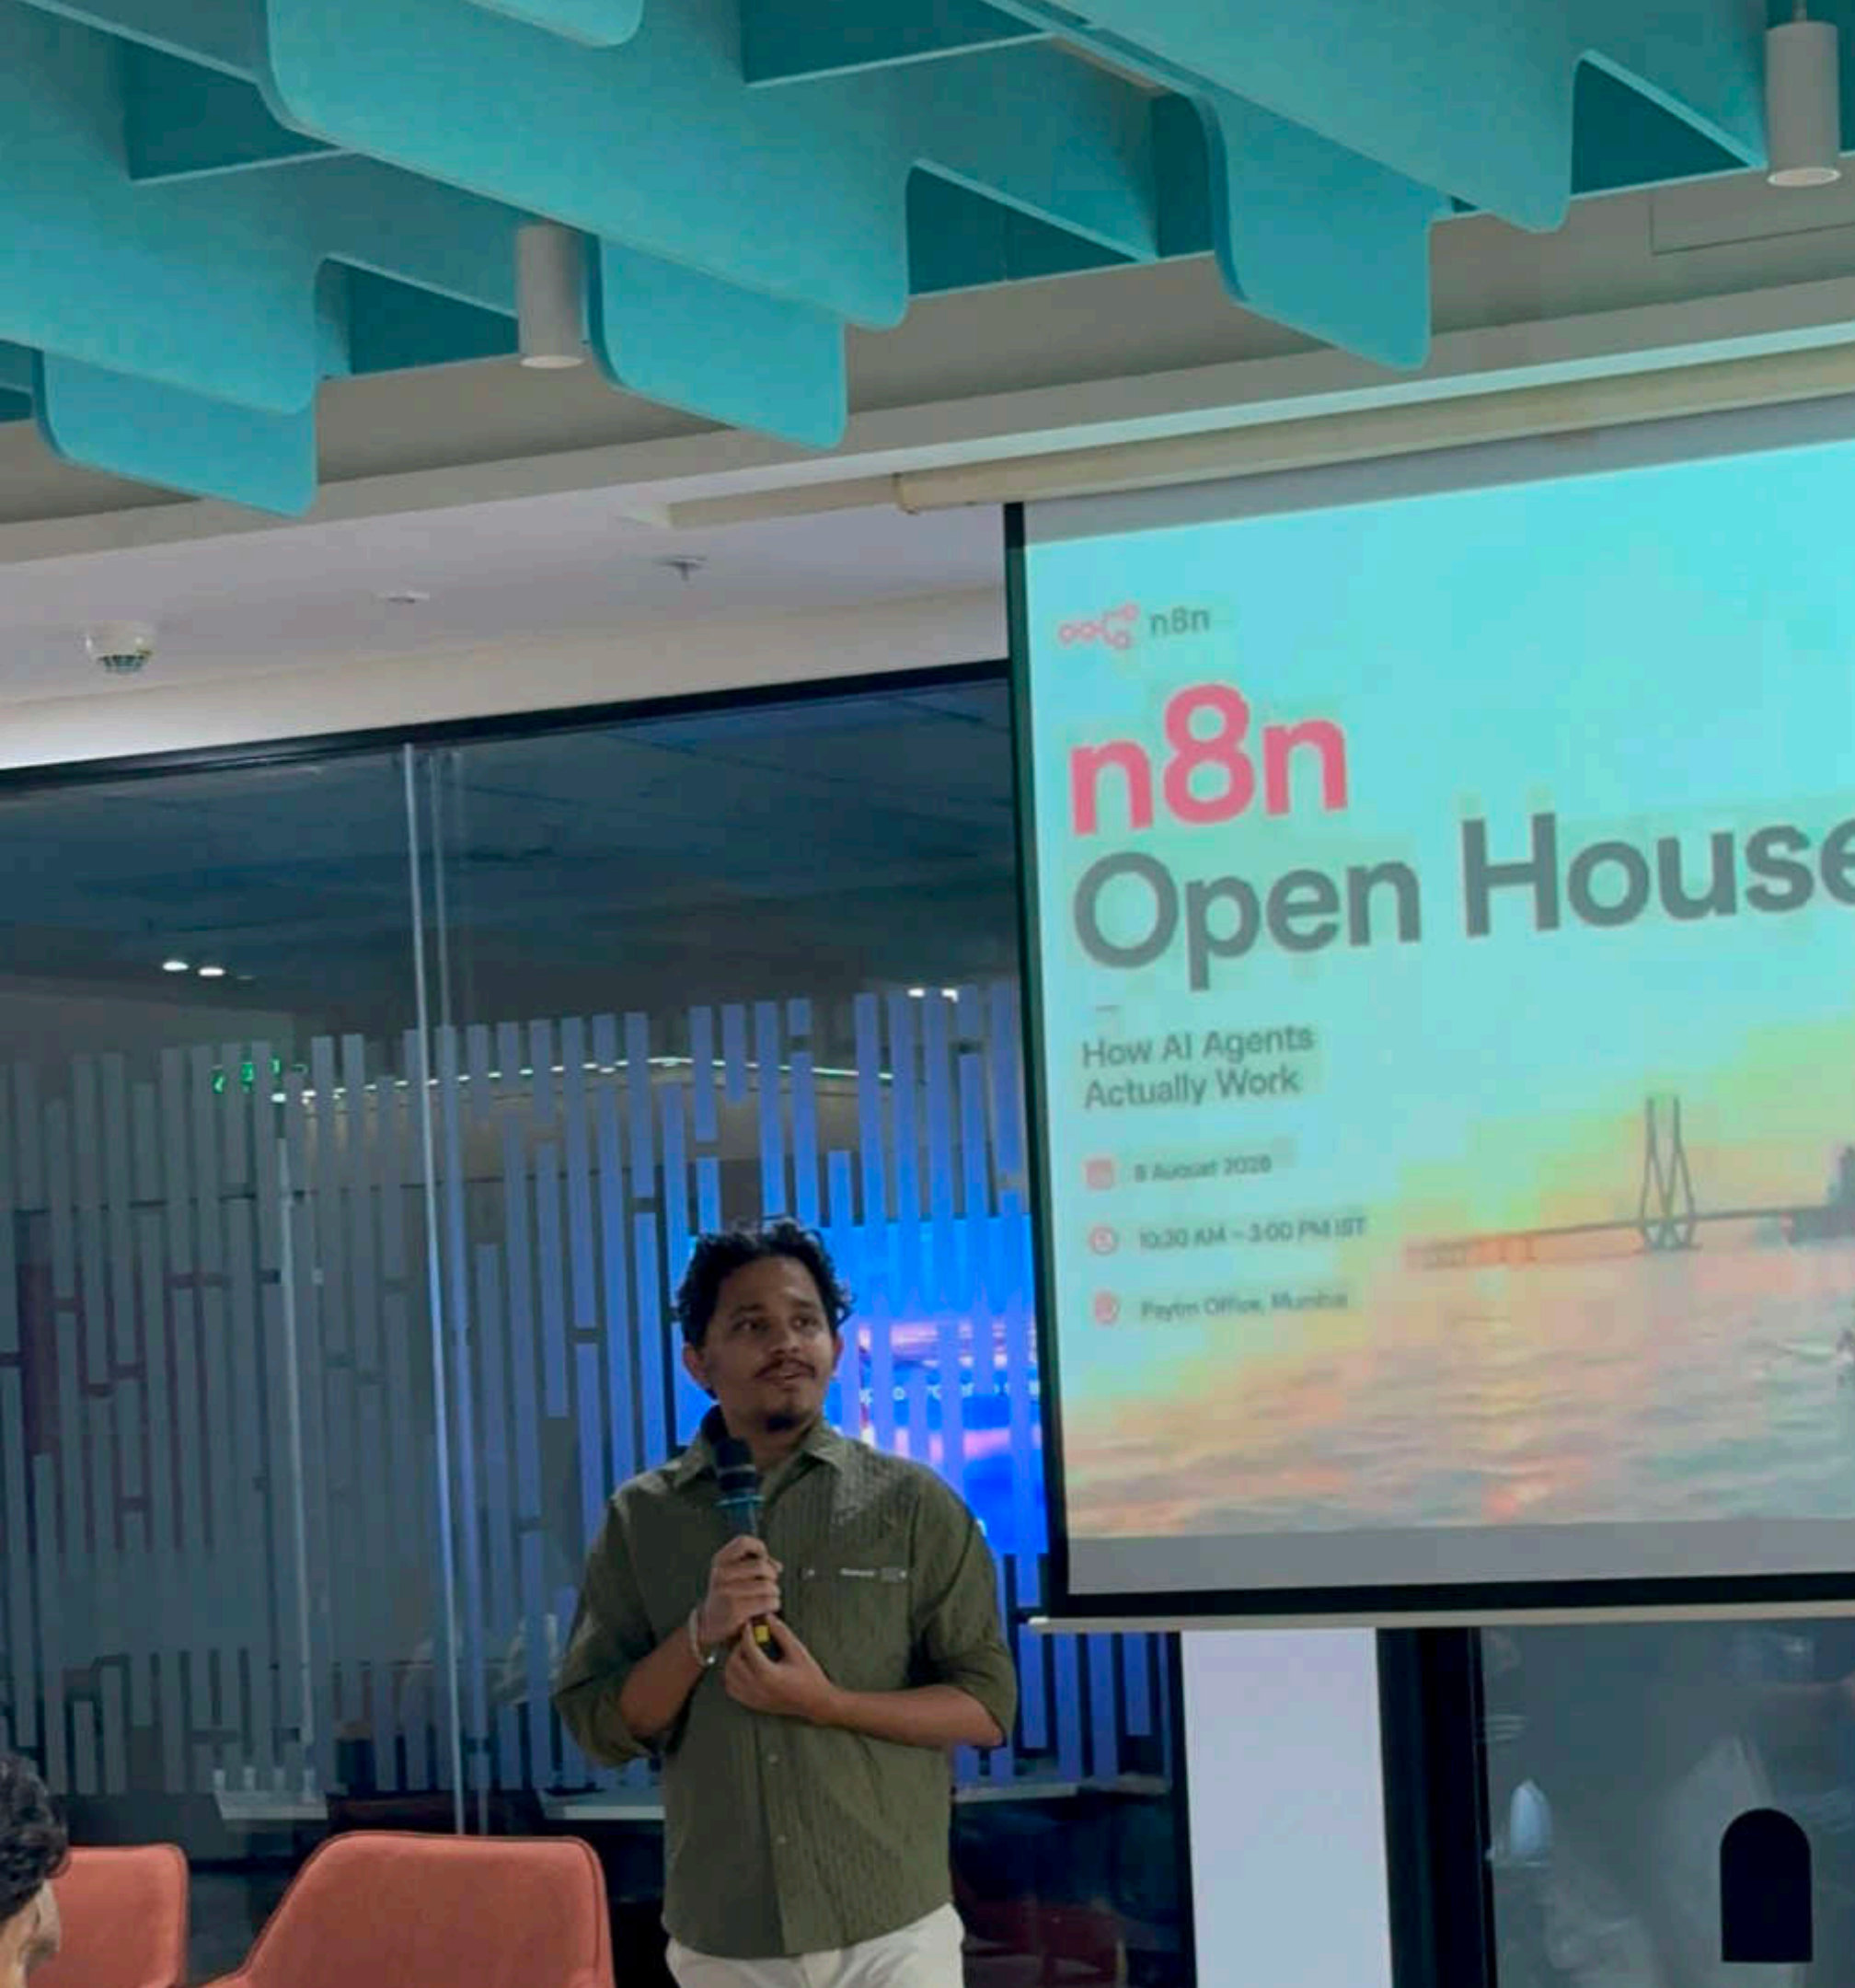

B.Tech, Artificial Intelligence & Data Science
University of Mumbai · GPA 8.85

CONNECTED WITH THE PEOPLE WHO RUN THESE COMMUNITIES IN INDIA

Google for Developers Claude Cursor Women in Product India South Park Commons Offlyn Swift n8n [+ many more](#)

It is my years of being part of hackathons, running hackathons, and organizing meetups that I know the people who run India's major developer ecosystems personally.

COMMUNITY I BUILT — N8N MUMBAI

I launched Mumbai's *n8n* community.

n8n Ambassador, Mumbai • first in-person Open House

15,000+

LUMA VIEWS

1,200+

REGISTERED

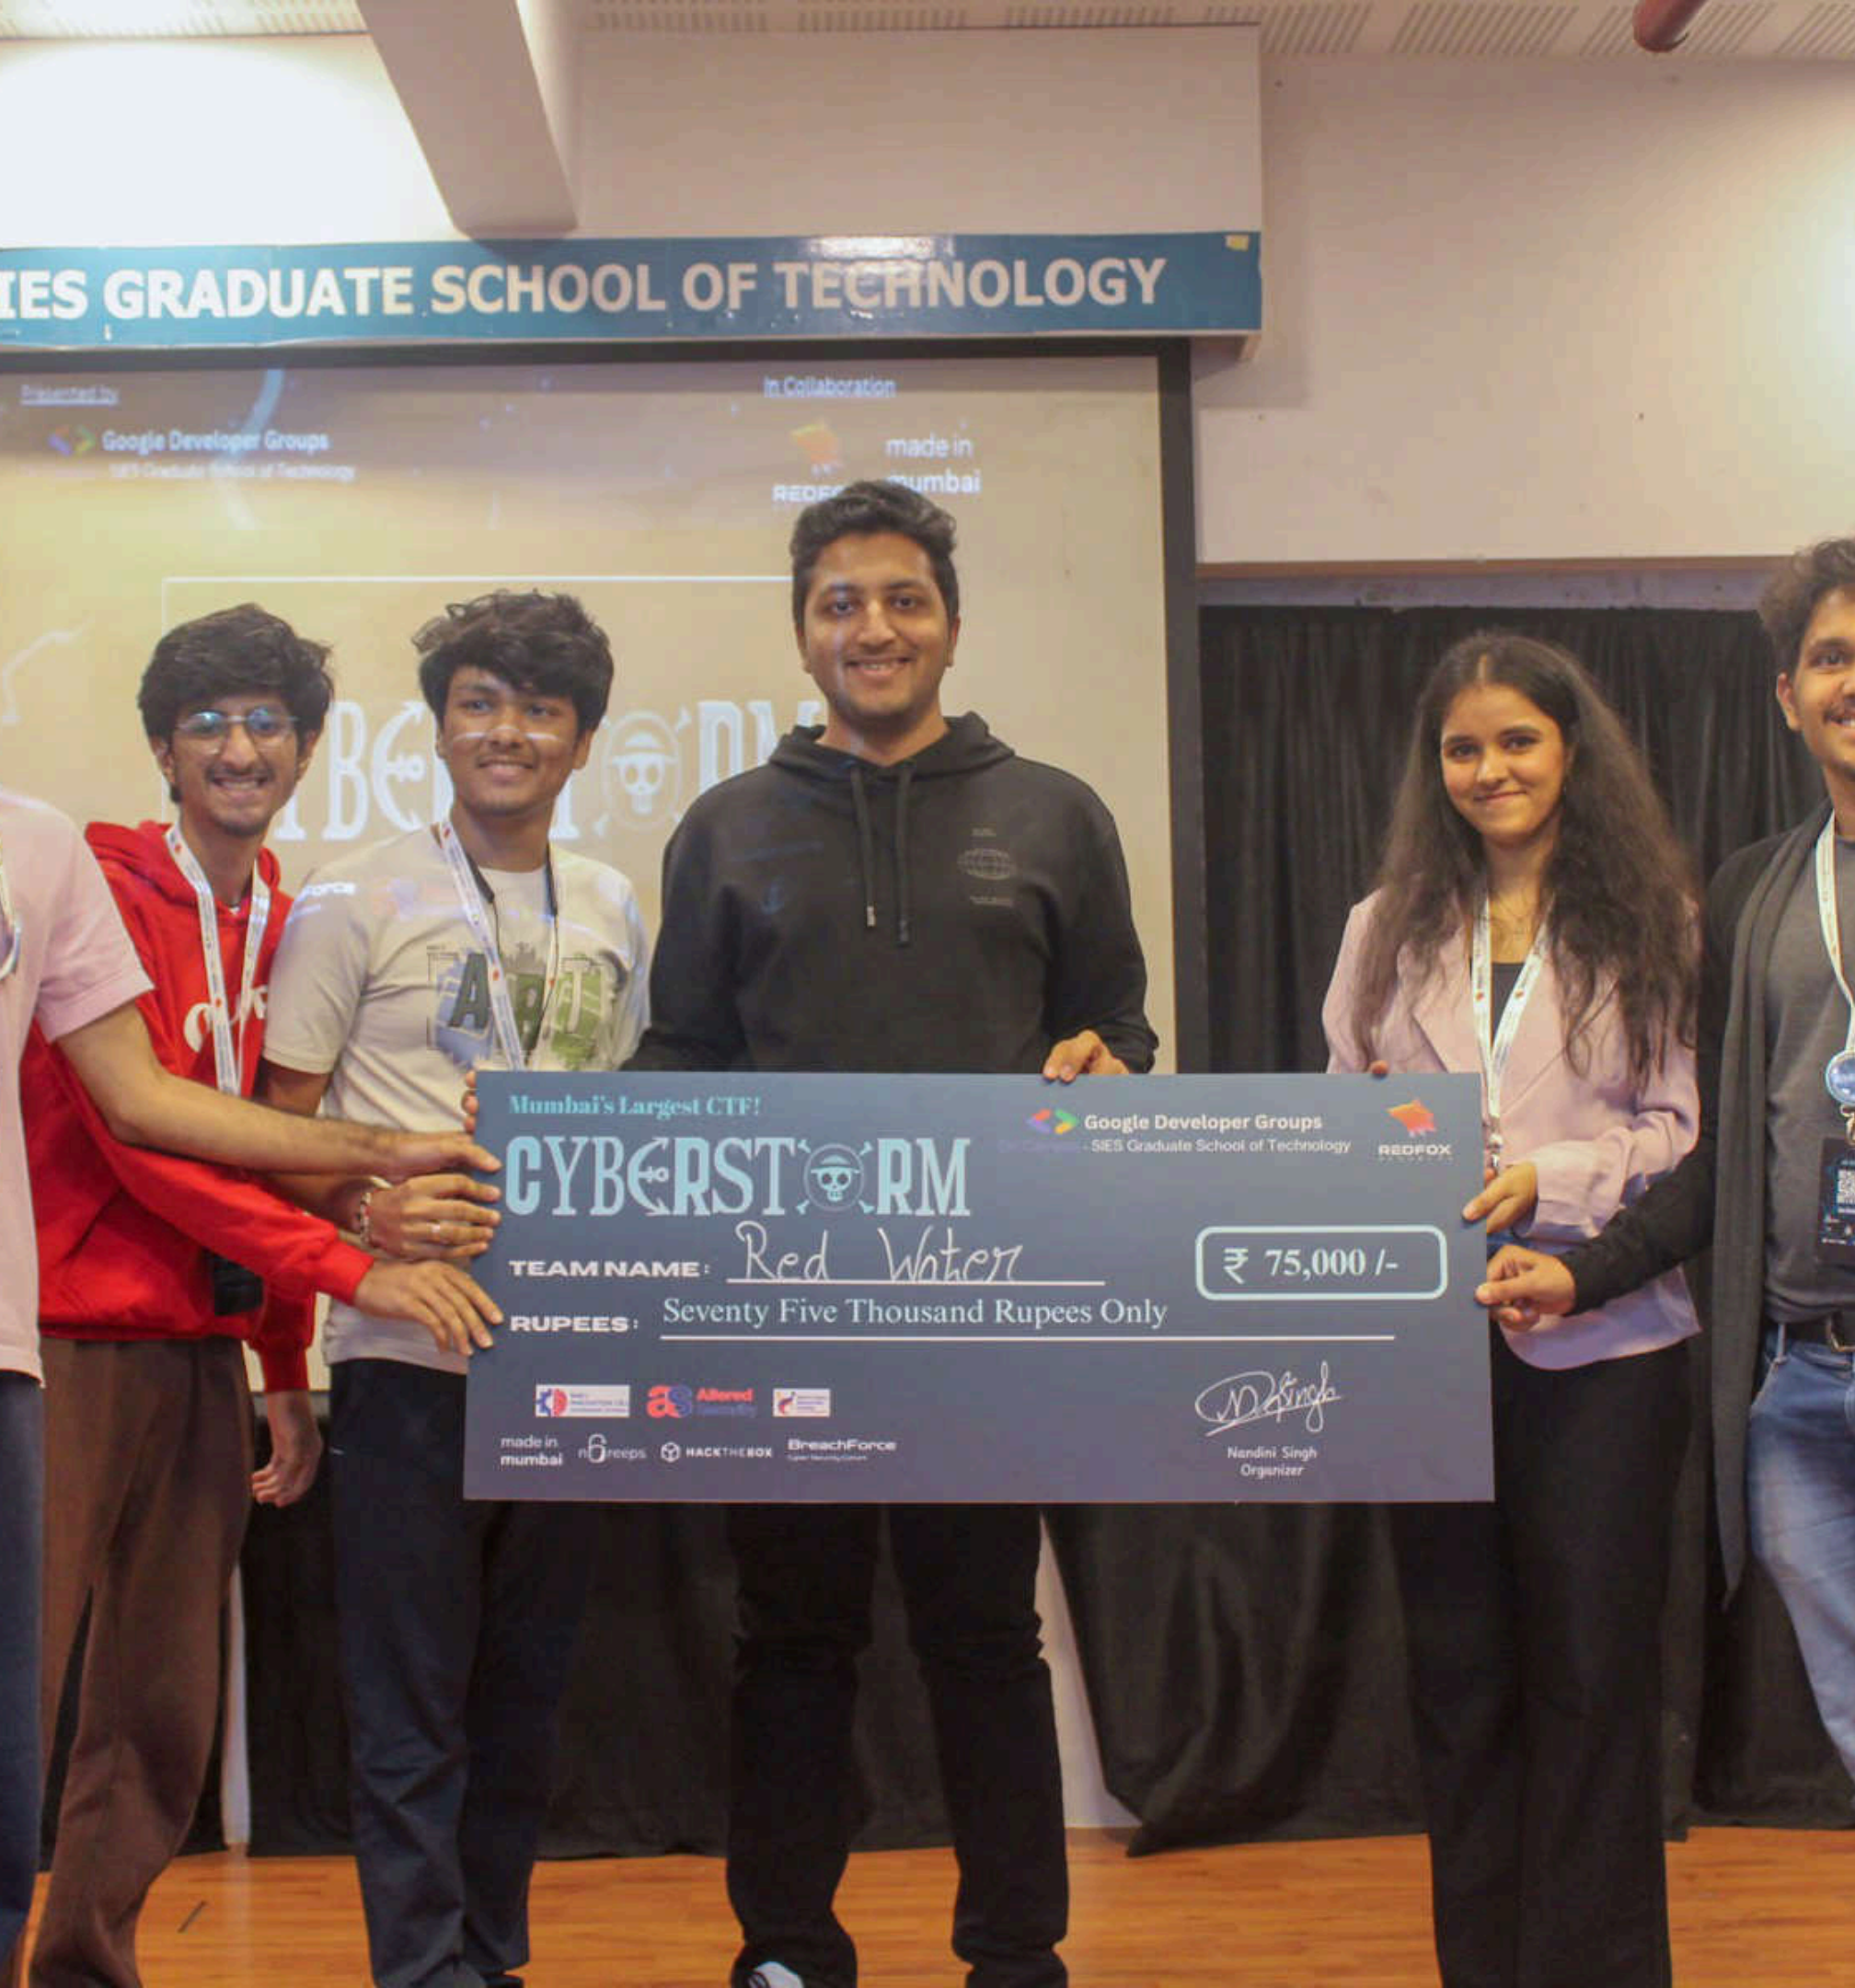

80

IN THE ROOM

1,000+

COMMUNITY IN 24H

Brought **Ishan Sharma** in for a session, **vibe-coded the feedback form live**, and got all three Mumbai ambassadors onto one stage. A 1,000+ member community within 24 hours of launch.

COMMUNITY I BUILT — CYBERSTORM CTF

Mumbai's largest CTF. *I ran it.*

Cyberstorm CTF • Main Organizer

5,000+

REGISTRATIONS

₹7L

PRIZE POOL

200

ON-GROUND

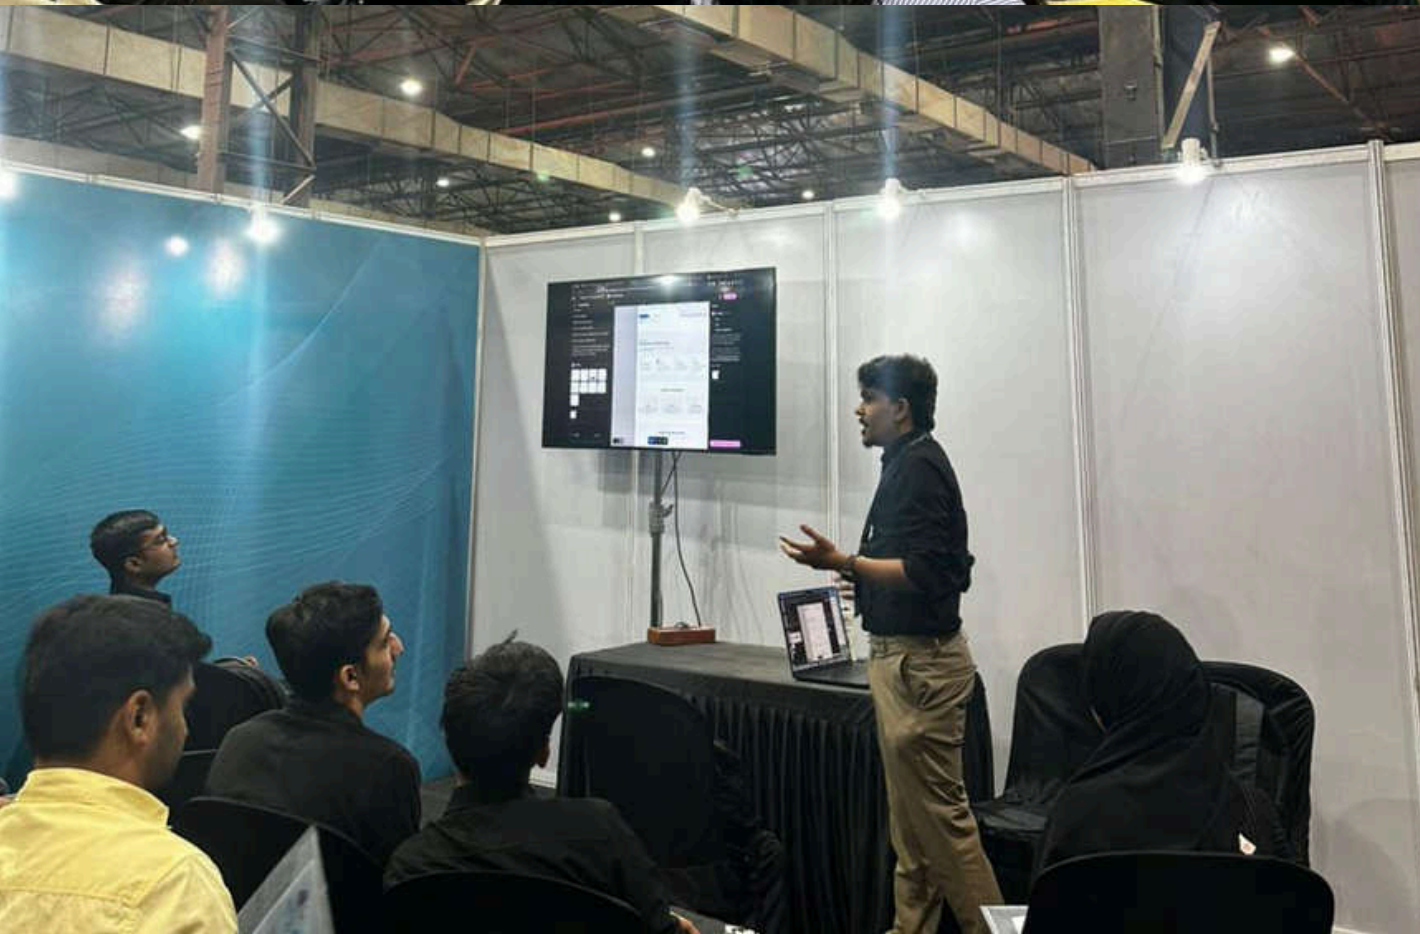

2,000

ONLINE ROUND

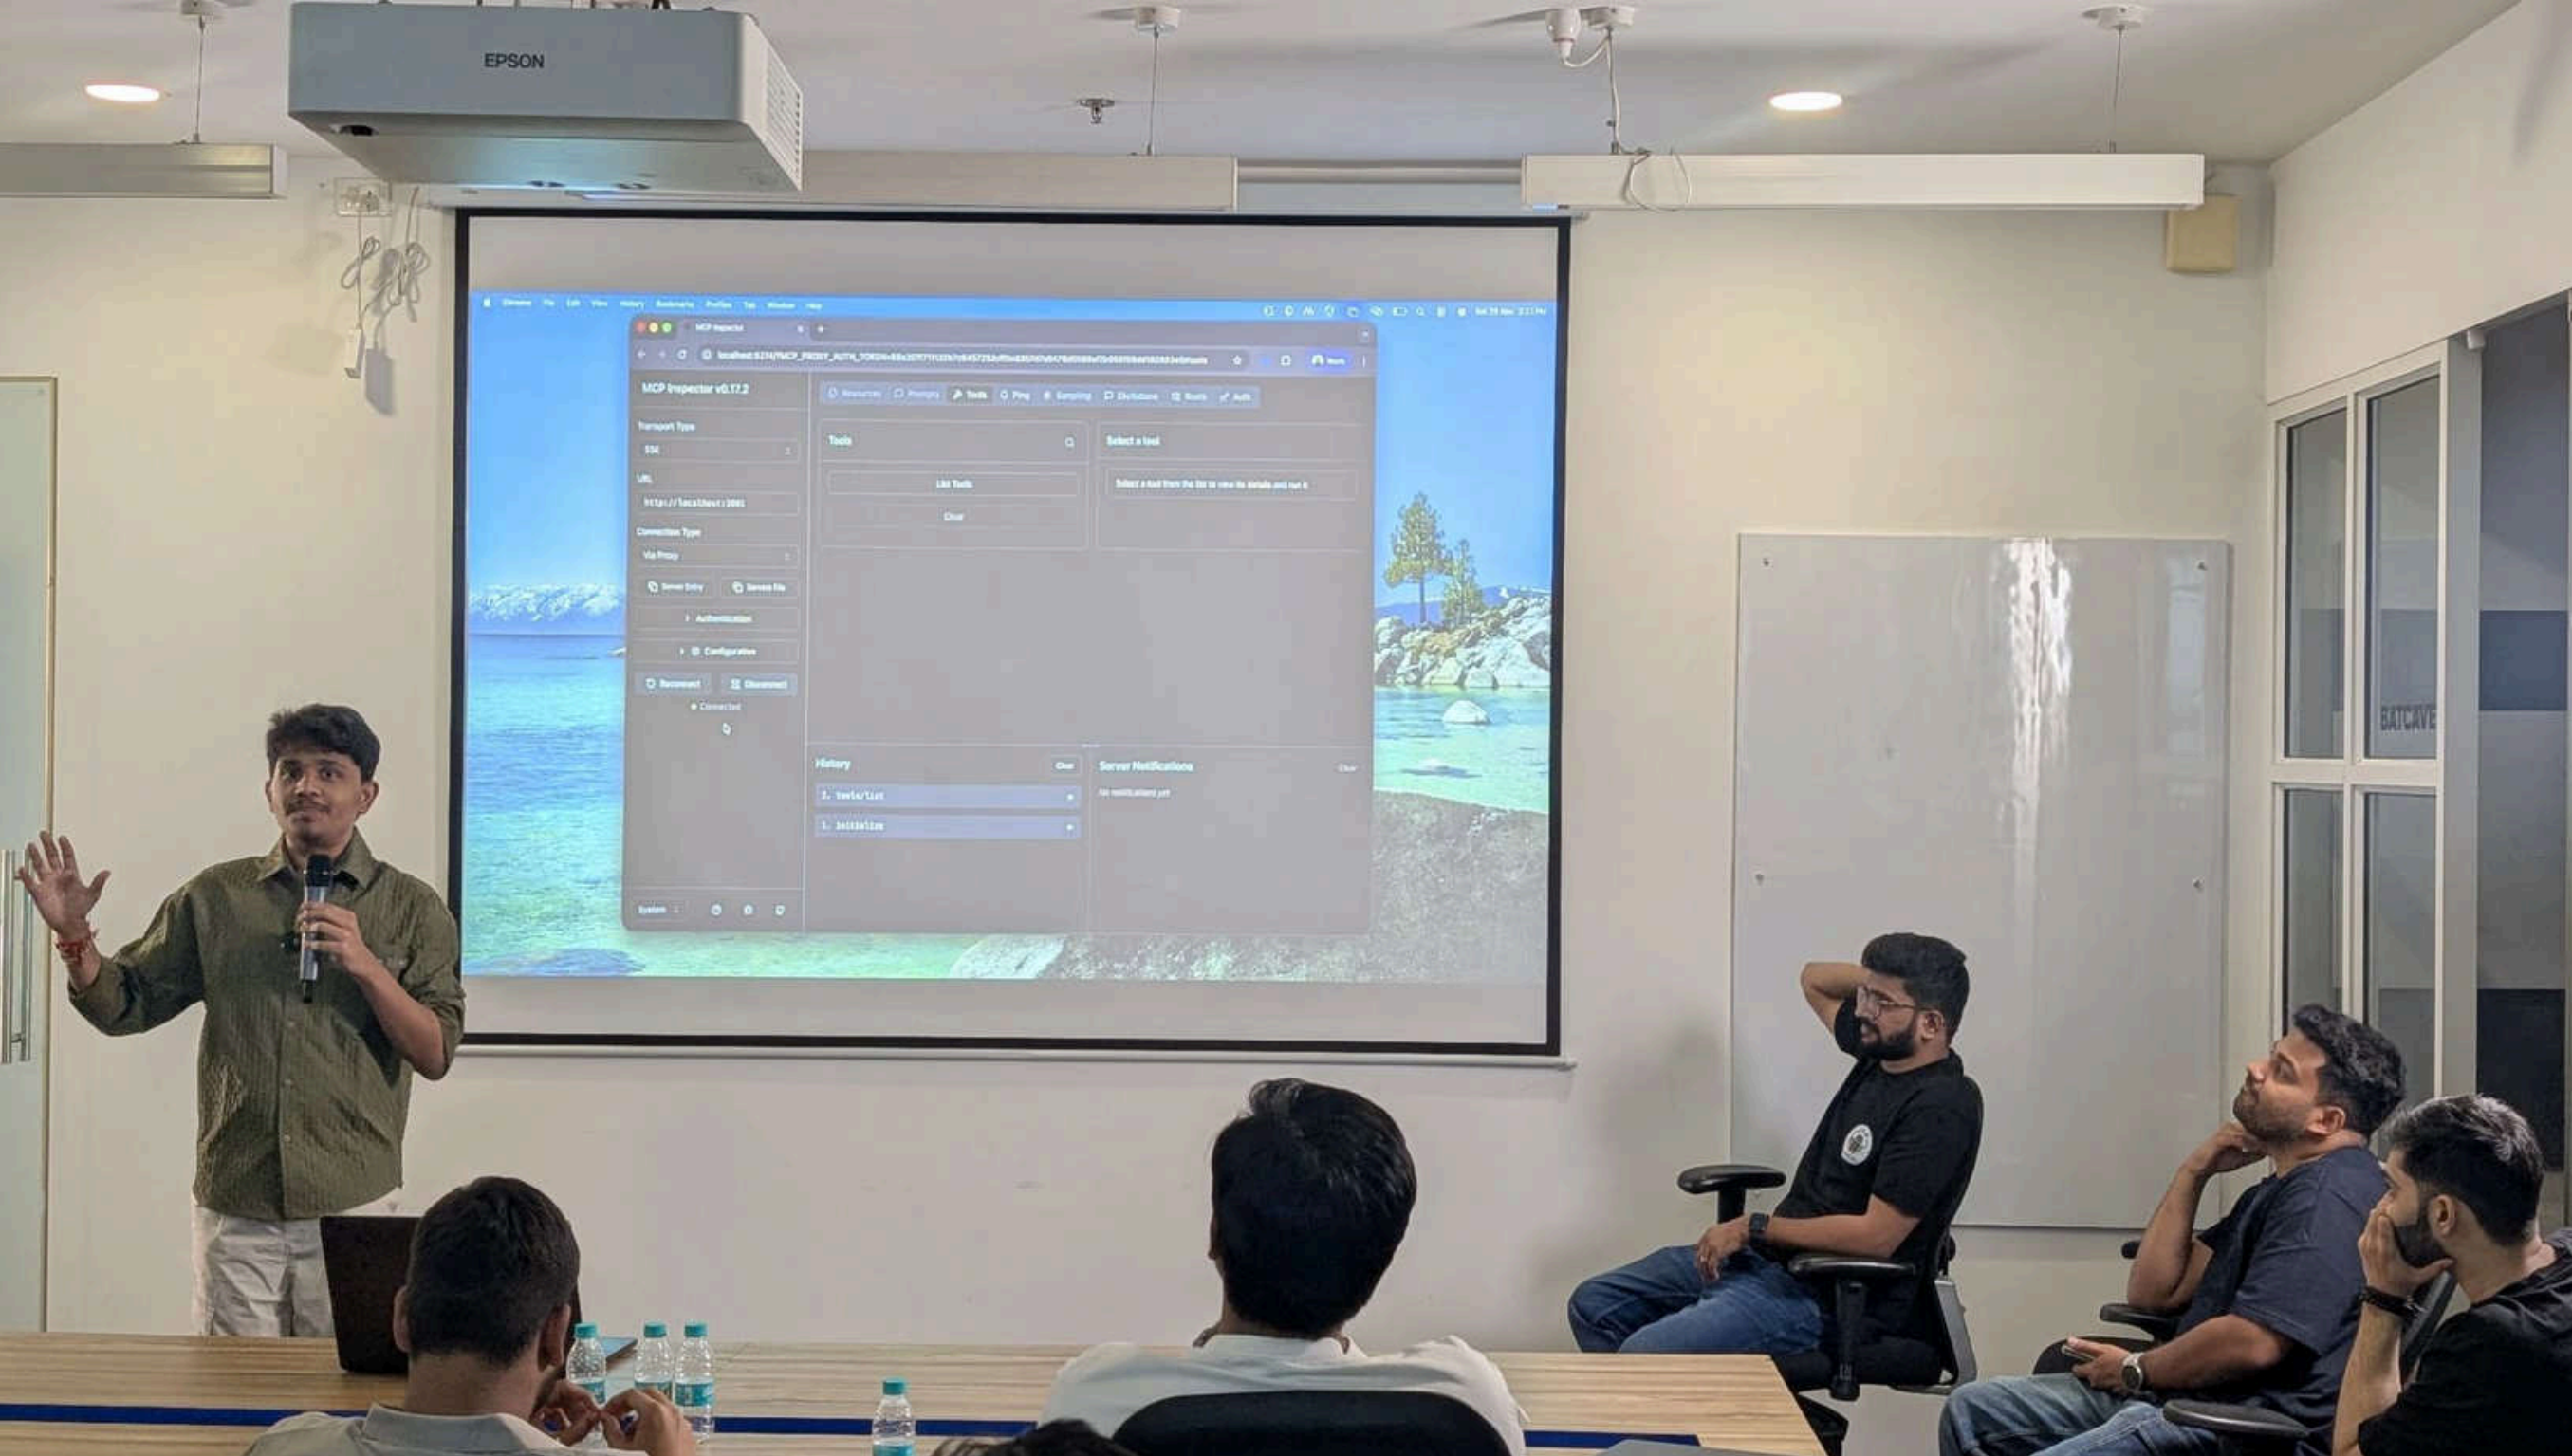

Handing out the winner's cheque. I owned it end to end: **sponsors, budget, logistics, and run-of-show**, a 2,000-person online round feeding 200 people onto the floor, without it ever feeling chaotic.

Devfest Bhopal

Devfest Mumbai

Droid Tribe 2.0

Speaker at Huddle in Shaadi (presenting in front of anupam, this is special because only senior leaders get a chance in this :).)

Congratulations again! 🏆

You made it to the 2024 Solution Challenge Global Top 100. This is an incredible accomplishment. You and your team should be very proud. 🥳🥳

Each member of your team will be awarded a limited edition Top 100 T-shirt, certificate, badge, and mentorship from Googlers and other experts to improve your project solutions for resubmission. We'll share more details about the t-shirt, certificate, and badge soon.

Message your team's Project Base Project on the First 100 page will be a big

(Something Special) 2x Winner at Solution Challenge 2024, 2025

I don't just run events. I make them *feel like something*.

Hey team,

Most people stop at logistics. I can't. Somewhere between the RSVP sheet and the run-of-show, I get restless and start building the things nobody asked for, but everyone ends up remembering.

I build and I bring people along. I have [shipped products](#) used by 200,000+ daily users and grew [Tripify](#) to 1,500+ users before it was acquired. Alongside that, I lead two of Mumbai's biggest developer communities, Google Developer Groups and n8n. I understand the technology, and I know how to get people actually using it.

When a workshop was heading toward being just another workshop, I made it [an AI teaser](#) instead of a poster, and then [did it again](#) for the next one. When people needed to give feedback, I didn't send a Google Form, I [vibe-coded a little app](#) overnight so it felt like part of the show.

That's the part of me a resume can't hold. I'm a **creative technologist**. I treat an event like a product and a product like a piece of art, and the tools are just paint. Give me a room of ambitious people and I'll find a way to make the moment worth screenshotting.

Wherever I go next, I would love to help the community around the work feel as alive and ambitious as the product itself.

With gratitude,

Kailash

KAILASH SHARMA • CREATIVE TECHNOLOGIST & COMMUNITY BUILDER

*P.S. of the P.S. / ask me for the teasers.
I make them for fun, not because anyone asked.*

Thank you ❤️
